PLANT OBSERVATIONS

The staff of Great Smoky Mountains National Park is interested in your observations of rarer plants in the park or the discovery of species that may be new for the park. Information on uncommon plant species that is of assistance to the park staff includes:

- ◆ exact location
- ◆ elevation
- ◆ number of fertile plants
- ◆ percentage of plants in each stage of reproduction (bud, flower, fruit, etc.)
- ◆ Your familiarity with the species

Send observations of unusual flora to:
 Inventory and Monitoring Office
 Great Smoky Mountains National Park
 1316 Cherokee Orchard Road
 Gatlinburg, TN 37738

Remember, collection of plant material requires a permit which is usually granted only for research or educational purposes. Sketching or photography are the preferable ways to document a plant's occurrence.
